

CCTV

Closed Circuit Television

Rapid advancements in CCTV technology has expanded its ability to enhance security as well as document visual activity. However, these changes have also created design, application and service challenges for most end-users. That's where our experience comes in. We work with you to select the right digital video technology and design it around your long-term needs. This includes Pan Tilt Zoom (PTZ) domes, display systems, matrix control systems, fibre optics, digital video storage and signal distribution systems.

What we do?

We provide high quality CCTV Installations and Maintenance services for the Retail, Domestic and Commercial Sector.. Please call us if we can help you. Our rates are very competitive and we only use high specification equipment.
